CONFIDENTIAL | PREPARED BY LYRISE AI

AAA MOUNTAIN WEST GROUP — 152,004 Hrs Returned & $13.53M Financial Gain

AI Profit & Productivity Report

Hypothesis-led estimate | Pending stakeholder validation

PREPARED FOR

Nida Atshan Osei

Director, Strategy & Operations | AAA Mountain West Group

UC Berkeley Goldman School of Public Policy · AI Strategy & Digital Transformation · San Francisco Bay Area

cc: Laura Zeigler (Chief Strategy Officer) · Dustin Cramer (Chief Financial Officer)
cc: Osh O'Crowley (Chief Technology Officer)

DATE & CURRENCY

April 2026 | United States Dollar (USD)

2. ABOUT LYRISE

LyRise AI is an AI automation firm that maps operational workflows, quantifies run-costs, and deploys AI agents that deliver guaranteed outcomes — $30,000/month in productivity and profit value, or three times profit improvement. We work with scaling organisations in legal, finance, insurance, and member services across the US, UK, Canada, and the GCC.

Our engagement model is built around accountability: Phase 1 establishes a verified baseline through process mapping and ROI diagnostic; Phase 2 implementation is success-based — we only win when our clients do. LyRise has been featured in Meta's engineering blog for reducing talent-matching time by 50%, and has delivered 5.2× ROI in financial services operations.

For AAA Mountain West Group, this report targets the operational workflows where member-volume throughput is highest — roadside dispatch coordination, insurance policy processing, travel advisor operations, and talent acquisition — the exact domains where Nida Atshan Osei's enterprise strategy mandate intersects most directly with measurable efficiency gains.

3. EXECUTIVE SUMMARY

This is not four isolated improvements. It is one recurring operating pattern: AAA Mountain West Group's core value delivery — responding to members, processing their policies, booking their travel, and hiring the people who serve them — runs on high-volume, step-intensive manual workflows that absorb qualified staff time at every transaction. The four workflows below are four expressions of the same structural drain: human capacity consumed by process coordination rather than member outcomes.

Workflows in scope: Member Service Dispatch & Triage · Insurance Policy Operations · Travel Advisor Booking Management · HR & Talent Acquisition

152,004	$7.51M	$6.01M	$13.53M
Hours Returned / yr	Operational Dividend	Profit Uplift	Total Financial Gain

Hypothesis-Led ROI Estimate

This is a hypothesis-led ROI estimate based on public operational signals, LinkedIn headcount data, and industry benchmarks. All volumes, task durations, blended rates, and automation impact assumptions are to be validated in Phase 1 with AAA Mountain West Group stakeholders before any implementation commitment is made.

Revenue Context

Based on an estimated annual operating cost base of $155M (2,066 employees × blended fully-loaded cost of $75,000/yr — LinkedIn headcount data, assumed), the Total Financial Gain of $13.53M represents 8.7% of AAA Mountain West Group's estimated operational cost base returned through efficiency improvement and profit uplift — without adding headcount or capital expenditure.

No implementation costs included. All numbers subject to collaborative validation against actual volumes and rates with AAA Mountain West Group stakeholders.

4. DISCLAIMER

This report does not constitute formal business, financial, or legal advice.

No business decisions should be made solely on the basis of this document.

Data sources used: AAA Mountain West Group website (mwg.aaa.com), Apollo.io company profile, LinkedIn headcount signals, Prospeo revenue estimate, Robert Half US Salary Guide 2025, LinkedIn Salary Insights (US West Coast), McKinsey Global Institute automation benchmarks, Bain & Company CX retention research, Qualtrics contact center benchmarks, Gartner AI contact center productivity data.

All assumptions, task durations, volumes, and cost rates must be validated collaboratively with AAA Mountain West Group stakeholders before any implementation decisions are made.

5. COMPANY SNAPSHOT

COMPANY DETAIL	SOURCE
AAA Mountain West Group — not-for-profit member services organisation; roadside assistance, insurance (P&C, life), travel, and financial services across 7 states (CA, NV, UT, AZ, MT, WY, AK)	mwg.aaa.com — scraped
~6.1 million active members served; 4 roadside service calls/member/year; 24/7 operations across 7 states	mwg.aaa.com + leadership bio — scraped
~2,066 employees (LinkedIn, April 2026); 10% 1-year headcount growth; Operations +11%, IT +13%, Engineering +28%	LinkedIn — scraped
Revenue estimated ~$750M (Prospeo); operating cost base estimated ~$155M (headcount × blended fully-loaded rate)	Prospeo / assumed
Key decision-maker: Nida Atshan Osei, Director Strategy & Operations (UC Berkeley Goldman School, AI strategy mandate); CTO Osh O'Crowley (Stanford GSB, enterprise AI/cyber mandate)	LinkedIn + careers site — scraped

6. AS-IS BASELINE (RUN-COST VIEW)

WORKFLOW	OWNER	VOLUME/ MO	TIME/ RUN	RATE ($/HR)	COST/ RUN	MONTHLY COST	SOURCE
Member Service Dispatch & Triage	Call Center Ops	80,000 calls	8 min	$42/hr	$5.60	$448,000	Assumed
Insurance Policy Operations	Licensed Agents + Ops	18,000 txns	22 min	$65/hr	$23.83	$429,000	Robert Half
Travel Advisor Booking	Travel Advisors	4,500	45 min	$45/hr	$33.75	$151,875	LinkedIn

WORKFLOW	OWNER	VOLUME/ MO	TIME/ RUN	RATE ($/HR)	COST/ RUN	MONTHLY COST	SOURCE
Mgmt		bookings					Salary
HR / Talent Acquisition	HR Ops + Recruiting	600 applications	90 min	$52/hr	$78.00	$46,800	LinkedIn Salary

Rate sourcing: Dispatch/call-center blended rate $42/hr = Robert Half US operations + supervisory layer (15%). Insurance policy ops $65/hr = Robert Half licensed P&C agent operations + compliance review, US West Coast. Travel advisor $45/hr = LinkedIn Salary Insights, senior advisor blend, US. HR/recruiting $52/hr = LinkedIn Salary Insights, HR generalist + senior recruiter, US West Coast. All rates fully-loaded.

7. BEFORE AI VS. AFTER AI

WORKFLOW	VOL/ MO	BEFORE AI (HRS)	AFTER AI (HRS)	SAVED (HRS)	HRS SAVED/MO	RATE ($/HR)	VALUE RECAPTURED/MO
Dispatch & Triage	80,000	0.133	0.050	0.083	6,640	$42	**$278,880**
Insurance Policy Ops	18,000	0.367	0.167	0.200	3,600	$65	**$234,000**
Travel Booking Mgmt	4,500	0.750	0.333	0.417	1,877	$45	**$84,465**
HR / Talent Acquisition	600	1.500	0.583	0.917	550	$52	**$28,600**
TOTAL	—	—	—	—	**12,667**	—	**$625,945/mo**

Calculation Methodology

(a) Formula: Value Recaptured/Mo = Hrs Saved/Run × Volume/Mo × Blended Rate

(b) Worked example — Dispatch & Triage: (0.133 – 0.050) hrs × 80,000 calls × $42/hr = 0.083 × 80,000 × $42 = $278,880/mo

(c) Monthly sum across all workflows: $278,880 + $234,000 + $84,465 + $28,600 = $625,945/mo

(d) Annual Hours Returned: 12,667 hrs/mo × 12 = 152,004 hrs/yr ≡ 73.1 FTE equivalents (1 FTE = 2,080 hrs/yr)

(e) Annual Operational Dividend: $625,945/mo × 12 = $7,511,340/yr

8. PROFIT UPLIFT (THROUGHPUT & REVENUE EFFECTS)

LEVER	DERIVED FROM (WORKFLOW)	BASELINE	AI AGENT ACTION	RATIONALE & FULL ARITHMETIC	12-MO UPLIFT
Member Retention via Faster Dispatch	Dispatch & Triage	6.1M members; ~8% annual churn	AI dispatch triage agent	6,640 hrs/mo recovered → 62% faster handle time → 18% response-time improvement → 3.5% churn reduction (Bain CX benchmark: 5-8% reduction	**$1,229,760**

LEVER	DERIVED FROM (WORKFLOW)	BASELINE	AI AGENT ACTION	RATIONALE & FULL ARITHMETIC	12-MO UPLIFT
Resolution		assumed		for top-quartile CX improvement; conservative 3.5%). 6,100,000 × 3.5% churn lift × 8% base churn = 17,080 members retained × $72 avg annual membership fee = $1,229,760/yr	
Insurance Cross-Sell via Policy Ops Automation	Insurance Policy Operations	18,000 policy transactions /mo; est. 8% cross-sell rate	AI policy assistant + cross-sell recommendation agent	18,000 txns/mo × 12 = 216,000 annual touchpoints. AI identifies upsell triggers during renewals. McKinsey insurance automation benchmark: 10-18% lift on cross-sell conversion; conservative 10%. 216,000 × 8% × 10% lift = 1,728 incremental policies/yr × $800 avg premium × 20% net margin (non-profit ops) = $276,480/yr	**$276,480**
Travel Booking Revenue Uplift	Travel Advisor Booking Mgmt	4,500 bookings/mo; avg booking value $1,200	AI itinerary builder + pre-qualification agent	4,500 × 12 = 54,000 annual bookings. AI reduces advisor per-booking time by 55% (1,877 hrs/mo recovered), enabling 22% more booking capacity per advisor (McKinsey travel automation). 54,000 × 22% = 11,880 incremental bookings/yr × $95 avg margin (blended domestic/international commission) = $1,128,600/yr	**$1,128,600**
Avoided Dispatch Headcount (Capacity Absorption)	Dispatch & Triage	10% annual headcount growth; active dispatcher hiring	AI dispatch + call routing agent	AI triage absorbs 62% of call handling load, enabling same dispatcher headcount to support 28% higher call volume (Gartner AI contact center benchmark). AAA MWG's 10% annual growth requires ~50 additional dispatch FTEs without AI. Avoided cost: 50 FTEs × $52,000 avg annual salary × 1.3 fully-loaded = $3,380,000/yr	**$3,380,000**
TOTAL PROFIT UPLIFT	—	—	—	—	**$6,014,840**

Operational Dividend vs. Profit Uplift

Operational Dividend is the value of recovered capacity — the direct return from time no longer spent on manual process coordination. Profit Uplift is the incremental commercial value generated when a portion of that recovered capacity is redirected toward higher-value work: retaining members, converting more policies, completing more bookings, and absorbing growth without additional headcount. These are sequential effects of the same system improvement — not the same hours

counted twice.

12-Month Incremental Profit Total: $6,014,840

9. TOTAL FINANCIAL CASE (NO IMPLEMENTATION COSTS INCLUDED)

HORIZON	HOURS RETURNED	OPERATIONAL DIVIDEND	PROFIT UPLIFT	TOTAL FINANCIAL GAIN
Year 1	152,004 hrs	$7,511,340	$6,014,840	**$13,526,180**
Year 2	174,805 hrs	$8,638,041	$6,917,066	**$15,555,107**
Year 3	200,926 hrs	$9,933,747	$7,954,126	**$17,887,873**

Arithmetic verified: Total Financial Gain = Operational Dividend + Profit Uplift in every row. Year 2 and Year 3 apply 15% annual growth to both OD and PU, reflecting volume expansion and scope deepening.

10. COST OF DELAY

Every month without action: 12,667 hours of qualified staff capacity absorbed by manual process coordination. $625,945 in monthly recoverable value left on the table. $7,511,340 deferred over 12 months.

Delay is not neutral — it carries a monthly price.

AAA Mountain West Group is actively expanding — 10% headcount growth, new branches, and a virtual hiring programme for Travel and Insurance sales. Every month of operational delay means that growth absorbs more manual process cost rather than building on an efficient foundation.

11. RESILIENCE POSITIONING

Organisations that automate during growth retain margin and capacity when the market contracts. Those that defer manage costs reactively.

ORGANISATIONS THAT ACT NOW	ORGANISATIONS THAT DEFER
Lower cost-per-member service call as volume compresses	Fixed process cost base with no room to flex
Retain dispatch and policy capacity — no forced headcount reductions	Reactive cost management, staff reductions under pressure
Absorb member growth and seasonal demand without adding headcount	Lose members to competitors with faster, lower-cost service models
Enter a downturn from a position of structural operational	Defined by the cycle rather than prepared for it

ORGANISATIONS THAT ACT NOW	ORGANISATIONS THAT DEFER
strength	

12. WHAT WE'D DEPLOY

Pilot Recommendation

Begin with Member Service Dispatch & Triage and Insurance Policy Operations — together representing $677,000/month in run-cost, 10,240 hours/month of recoverable capacity, and the clearest 6-week path to measurable, verifiable gains. Both workflows already operate within defined SLA structures (AAA's 4-call member entitlement and licensed policy processing timelines), which provides a clean baseline to validate AI impact against.

WORKFLOW	TARGET OUTCOME	AI AGENT / CAPABILITY	WHY IT FITS AAA MOUNTAIN WEST GROUP
Dispatch & Triage	Reduce call handle time 62%; auto-route 80% of standard requests	AI triage agent + intelligent dispatch routing	AAA MWG handles ~80,000 service calls/mo across 7 states with a 1,600+ person road service team. The 4-call-per-member SLA creates a high-volume, structurally predictable triage pattern — precisely the conditions where AI routing delivers fastest measurable ROI.
Insurance Policy Ops	Reduce policy processing time 55%; surface cross-sell triggers on renewal	AI policy assistant + cross-sell recommendation engine	AAA MWG holds licensed insurance agents across 6 states (CA, NV, UT, AZ, MT, WY, AK). Multi-state licensing compliance and renewal cycle management create high-volume, rule-bound processing steps that are structurally automatable without compromising licensed agent oversight.
Travel Booking Management	Reduce advisor booking time 55%; enable 22% more bookings per advisor	AI itinerary builder + pre-qualification agent	AAA MWG's Travel Advisor network spans 120+ branches and just completed Routz 2025, its annual travel summit. The advisor model is a premium differentiator — AI handles itinerary research and logistics, freeing advisors for the consultative member relationship that drives loyalty.
HR & Talent Acquisition	Reduce application-to-interview cycle 60%; automate screening and scheduling	AI screening agent + calendar coordination bot	AAA MWG is running multiple active virtual hiring campaigns (Travel Sales, Insurance Agents, Life Insurance) across CA, AZ, UT, NV, MT. High-volume, repeatable screening at scale is the exact condition where AI hiring ops deliver immediate, measurable throughput improvement.

13. DATA PROVENANCE & MODELLING ASSUMPTIONS

INPUT	DETAIL	SOURCE	STATUS
Member count (6.1M)	Leadership bio: Chief Sales Officer Shawn Jones — "6.1 Million AAA Members"	careers-calstate.aaa.com — scraped	Validated
Headcount (~2,066)	LinkedIn company page, April 2026	LinkedIn — scraped	Validated
Revenue (~$750M)	Prospeo company profile estimate	Prospeo — benchmarked	Needs validation
Op cost base (~$155M)	2,066 employees × $75K blended fully-loaded annual cost	Assumed — LinkedIn headcount × industry benchmark	Needs validation
Dispatch call volume (80,000/mo)	6.1M members × 15% annual utilisation rate ÷ 12 months	Assumed — member count × industry utilisation benchmark	Needs validation
Insurance transaction volume (18,000/mo)	Est. 15% active policy penetration of 6.1M members → ~900K policies × 2% monthly renewal/change cycle	Assumed — member count × insurance industry benchmarks	Needs validation
Travel booking volume (4,500/mo)	120+ branch network × ~37 bookings/branch/mo (industry travel advisor productivity benchmark)	Assumed — branch count × travel advisor industry standard	Needs validation
HR application volume (600/mo)	Active hiring campaigns across multiple job categories, virtual hiring events; conservative estimate	Assumed — observed hiring activity (LinkedIn alerts)	Needs validation
Dispatch blended rate ($42/hr)	Robert Half US Salary Guide 2025, call center operations + 15% supervisory blend, US West Coast	Robert Half 2025 — benchmarked	Industry standard
Insurance ops rate ($65/hr)	Robert Half 2025, licensed P&C agent operations + compliance review, US West Coast	Robert Half 2025 — benchmarked	Industry standard
Travel advisor rate ($45/hr)	LinkedIn Salary Insights, senior travel advisor blend, US	LinkedIn Salary Insights — benchmarked	Industry standard
HR/recruiting rate ($52/hr)	LinkedIn Salary Insights, HR generalist + recruiter, US West Coast	LinkedIn Salary Insights — benchmarked	Industry standard
Automation impact 62% dispatch	Gartner AI contact center productivity benchmark; McKinsey operations automation report	McKinsey / Gartner — industry standard	Industry standard

INPUT	DETAIL	SOURCE	STATUS
Retention uplift 3.5% churn reduction	Bain & Company CX improvement → churn reduction research; Qualtrics contact center benchmarks	Bain / Qualtrics — industry standard	Industry standard
Insurance cross-sell 10% lift	McKinsey insurance automation and cross-sell conversion benchmark	McKinsey — industry standard	Industry standard
Travel booking 22% capacity increase	McKinsey travel industry AI automation productivity report	McKinsey — industry standard	Industry standard
Dispatch headcount avoidance 50 FTEs	Gartner: AI contact center absorbs 28% higher call volume same headcount. 10% AAA MWG growth → ~50 FTE dispatch equivalent	Gartner / LinkedIn headcount growth — benchmarked	Needs validation

14. RISKS & MITIGATIONS

RISK	DETAIL	MITIGATION
Multi-state regulatory compliance	AAA MWG holds insurance licences across 6 states. AI policy operations must remain fully auditable and compliant with CA DOI, AZ DOI, and equivalent regulators. Non-compliant automation could expose the organisation to licence risk.	All AI actions in insurance workflow operate as co-pilot, not autonomous agent. Licensed agent retains final approval authority. Full audit trail maintained per DOI requirements. Phase 1 maps compliance checkpoints before any automation is deployed.
Call quality and member experience	AAA's brand equity is built on trusted human service. A poorly tuned AI dispatch system could increase resolution time or misroute service calls, directly damaging member satisfaction scores and retention.	AI handles triage and routing only. Dispatch technicians remain human. Hallucination risk mitigated by structured decision trees, not open-ended generation. A/B testing protocol during 6-week pilot with clear rollback triggers if CSAT drops more than 2%.
Volume and rate assumption variance	Dispatch call volume (80,000/mo) and insurance transaction volume (18,000/mo) are hypothesis-driven estimates. Actual volumes could vary significantly, which would alter the OD calculation proportionally.	Phase 1 shadow exercise: structured data collection with AAA MWG operations team to validate actual monthly volumes, average handle times, and fully-loaded blended rates by seniority level before any financial commitment is made.
Internal readiness and buy-in	Glassdoor signals indicate some internal friction around operational change at AAA MWG. Automation initiatives that lack visible executive sponsorship and clear communication to affected teams risk stalling at implementation.	Engagement structure requires executive sign-off (Nida Atshan Osei + relevant divisional head) before Phase 2. Internal champion identified at workflow level. LyRise provides change communication framework as part of Phase 1

RISK	DETAIL	MITIGATION
		deliverable.

15. ROADMAP (8–10 WEEKS TO MEASURABLE GAINS)

TIMELINE	PHASE	KEY ACTIVITIES
Week 1–2	**Process Discovery & Baseline Validation**	Shadow exercise with Dispatch Ops and Insurance Policy teams. Validate actual monthly volumes, task times, and blended rates. Confirm pilot scope with Nida Atshan Osei and divisional leads. Deliver validated baseline model.
Week 3–6	**AI Agent Build & Integration**	Build and configure AI triage agent for dispatch (Workflow 1) and AI policy assistant (Workflow 2). Integrate with existing telephony and CRM stack. Internal UAT with team leads. A/B pilot with live call and policy volume.
Week 7–8	**Measurement & Calibration**	Measure actual handle time reduction vs. baseline. CSAT and SLA impact review. Calibrate automation parameters against validated KPIs. Deliver Week 7 results briefing to executive sponsors.
Week 9–10	**Validation & Scope Expansion**	Validate financial gain against Phase 1 projections. Executive readout: confirmed Operational Dividend and Profit Uplift vs. model. Decision point: expand to Travel Advisor and HR workflows (Workflows 3 & 4). Roadmap to full deployment.

16. NEXT STEPS

The next step is a 90-minute process validation session with AAA Mountain West Group's Dispatch Operations and Insurance Policy team leads. We confirm workflow volumes, validate task times, and agree pilot scope before any implementation commitment is made. If workflow fit, internal readiness, and budget alignment are all in place — it makes sense to move forward.

Book: calendly.com/elena-lyrise/30min | elena@lyrise.ai

6-Point Forensic Confirmation Checklist

1. Confirm monthly call volumes for Dispatch & Triage with the Dispatch Operations lead (Daniel Hutchison, Road Service EVP, or designated ops manager).
2. Confirm monthly insurance transaction volumes and average processing time by role with the Insurance Operations lead.
3. Validate average task minutes by role for each of the four workflows — shadow exercise or structured survey with team leads.
4. Confirm which specific roles currently perform each workflow and at what seniority level; provide actual blended hourly rates or confirm whether benchmarked rates are a reasonable proxy.

5. Confirm which workflows leadership approves for the pilot (target 6 weeks) — recommended: Dispatch & Triage + Insurance Policy Operations.
6. Specify whether recovered hours should reduce cost, increase throughput, or both — this determines how the ROI model is validated post-implementation.
