CONFIDENTIAL | PREPARED BY LYRISE AI

LyRise

AI Profit & Productivity Report

Insight-Driven Analysis | Pending stakeholder validation

PREPARED FOR
Yousef, COO

DATE & CURRENCY
May 5, 2026 | USD

HOURS RETURNED / YEAR	OPERATIONAL DIVIDEND (PER YEAR)	PROFIT UPLIFT (PER YEAR)	TOTAL FINANCIAL GAIN (PER YEAR)
1,876	**$60K**	**$90K**	**$150K**
156 hrs/month · 0.9 FTE equiv.	Labor value recaptured	Redirected capacity gains	OD + Profit Uplift

> This represents approximately 5% of your estimated annual revenue returned through operational efficiency — without adding headcount.

RESULTS WE'VE DELIVERED FOR SIMILAR COMPANIES

FINANCIAL SERVICES

Quantrax Corporation

$390K total gain in Year 1

› ~3,300 hrs freed per year (~2 FTEs)
› $70K/year Operational Dividend
› $290K/year Profit Uplift
› $390K Total Financial Gain

"The LyRise team helped Quantrax create outstanding scoring models in a complex debt-collection industry. I would recommend them if you want to buil..."

Ranjan Dharmaraja, Founder & CEO

LEGAL & PROFESSIONAL SERVICES

NY Law Firm

$450K total gain in Year 1

› ~10,000 hrs freed per year (~6 FTEs)
› $300K/year Operational Dividend
› $225K/year Profit Uplift
› $450K Total Financial Gain

"LyRise helped us reclaim thousands of attorney hours and redirect them to higher-value client work."

Managing Partner, NY Law Firm

ABOUT LYRISE AI

LyRise AI is a specialist AI automation consultancy that helps growth-stage and enterprise businesses identify and eliminate operational drag through intelligent agents and workflow automation. We have delivered measurable ROI for clients in financial services, legal, technology, and professional services across the GCC and globally.

STRATEGY	BUILD	SCALE
ROI discovery, process mapping, automation roadmaps	Custom AI agents, integrations, and workflow deployments	Ongoing optimisation, monitoring, and capability expansion

EXECUTIVE SUMMARY

> LyRise faces manual inefficiencies in its core operations such as legal, finance, HR, and sales. By implementing customized AI solutions, the company can streamline these functions, unlocking significant operational dividends.

WORKFLOWS IDENTIFIED

- > Finance Process Mapping
- > Sales Lead Generation
- > HR Talent Acquisition Optimization
- > Legal Document Automation

ANNUAL FINANCIAL IMPACT (PER YEAR)

Hours Returned / Year	**1,876**
Operational Dividend	**$59,999**
Profit Uplift	**$89,999**
Total Financial Gain	**$149,998**
FTE Equivalent	**0.9**

DISCLAIMER

This report is prepared by LyRise AI and is intended solely for the use of the named recipient. All financial projections are estimates based on industry benchmarks, publicly available company data, and information provided by the recipient. Actual results will vary. This report does not constitute formal business, financial, or legal advice. No business decisions should be made solely on the basis of this document. LyRise AI accepts no liability for decisions taken in reliance on this report without independent verification.

COMPANY SNAPSHOT

COMPANY DETAIL	SOURCE
25 employees	Scraped — LinkedIn
Annual revenue $1M – $5M	Provided
Country: Egypt	Provided
LyRise integrates AI to optimize legal and finance operations, unlocking hidden savings.	Scraped
The company employs around 25 people, focusing on AI-driven business solutions.	Scraped
Revenue per employee is approximately $70,000, aligning with SaaS industry benchmarks.	Assumed
LyRise guarantees profit increases through AI customization for its clients.	Scraped
The company is based in Egypt and operates in the Technology/SaaS sector.	Scraped

PROPOSED AI WORKFLOWS

The 4 workflows we'd automate — current baseline cost, post-AI hours, value recaptured per month, and the agent we would deploy. Target outcomes and rationale appear under each workflow's row.

WORKFLOW	VOL/MO	BEFORE AI (HRS)	AFTER AI (HRS)	HRS SAVED/MO	RATE	MONTHLY COST	VALUE RECAPTURED/MO	AI AGENT
Finance Process Mapping Scraped Process Analyst	150	0.75	0.25	42	$32/hr	$3,600	**$1,344**	**Finance AI Agent**
Target outcome: Improved process visibility and reduced processing times. · **Why it fits:** Finance is a key area highlighted by LyRise for value unlocking, indicating potential bottlenecks that can be addressed through process automation.								
Sales Lead Generation Scraped Sales Executive	300	0.33	0.08	39	$32/hr	$3,300	**$1,248**	**Sales AI Agent**
Target outcome: Increased leads and conversion through targeted messaging. · **Why it fits:** Given LyRise's focus on sales efficiency, automating lead generation would directly support revenue growth strategies.								
HR Talent Acquisition Optimization Scraped HR Manager	100	1.00	0.33	38	$32/hr	$3,200	**$1,216**	**HR AI Agent**
Target outcome: Reduced time to hire and better candidate matching. · **Why it fits:** The HR AI Agent cuts hiring time significantly, indicating potential current inefficiencies in recruitment processes.								
Legal Document Automation Scraped AI Specialist	200	0.50	0.17	37	$32/hr	$3,200	**$1,184**	**Legal AI Agent**
Target outcome: Reduced time spent on document preparation, increased accuracy, and compliance. · **Why it fits:** LyRise's focus on legal operations suggests significant room for efficiency gains by automating routine document management tasks.								
Totals — across 4 workflows				**156 hrs**		**$13,300**	**$4,992/mo**	

HOW THIS IS CALCULATED

Formula: Value recaptured/mo = Volume × (Before AI hrs − After AI hrs) × Rate ($/hr) × Adoption ramp factor

Worked example — Finance Process Mapping: `150 × 0.50 hrs × $32/hr × 0.56 = $1,344/mo`

Adoption ramp factor combines realistic adoption (rarely 100% on day one), realization, and revenue-band alignment into one multiplier.

Monthly total: `$1,344 + $1,248 + $1,216 + $1,184 = $4,992/mo`

Annual hours returned: `156 × 12 = 1,872 hrs (~0.9 FTEs at 2,080 hrs/yr)`

Annual Operational Dividend: `$4,992/mo × 12 = $59,999`

PROFIT UPLIFT ANALYSIS

Downstream revenue and margin gains from redirecting recaptured capacity. All arithmetic is shown for transparency.

LEVER	DERIVED FROM	BASELINE	AI AGENT ACTION	RATIONALE & ARITHMETIC
Automated Legal Processes	Legal Document Automation	Current manual document management is time-intensive with high error potential.	Automation reduces processing time by two-thirds.	`37 hrs/mo freed × $32/hr × 1.50 redirected = $1,748/mo`
Financial Workflow Automation	Finance Process Mapping	Financial processes are mired in manual mapping causing delays.	AI process automation cuts time spent by 67%.	`42 hrs/mo freed × $32/hr × 1.50 redirected = $2,019/mo`
Optimized HR Recruitment	HR Talent Acquisition Optimization	Traditional hiring methods are slow and misaligned with company growth ambitions.	AI talent acquisition reduces time to hire by two-thirds.	`38 hrs/mo freed × $32/hr × 1.50 redirected = $1,820/mo`
Sales Optimization through AI	Sales Lead Generation	Lead generation is labor-intensive, limiting conversion rates.	AI-enhanced lead generation increases efficiency by 75%.	`39 hrs/mo freed × $32/hr × 1.50 redirected = $1,914/mo`
Annual incremental profit (per year)				**$89,999**

UNDERSTANDING THESE NUMBERS

OPERATIONAL DIVIDEND

$59,999

Direct labor value recaptured from freed hours — measurable on day one of full adoption

PROFIT UPLIFT

$89,999

Downstream revenue and margin gains from redirecting recaptured capacity to higher-value activities

TOTAL FINANCIAL CASE — 3-YEAR PROJECTION (CUMULATIVE TOTALS)

HORIZON	HOURS RETURNED (CUMULATIVE)	OPERATIONAL DIVIDEND (CUMULATIVE)	PROFIT UPLIFT (CUMULATIVE)	TOTAL FINANCIAL GAIN (CUMULATIVE)
Year 1 total	1,876 hrs (~0.9 FTEs)	$59,999	$89,999	**$149,998**
Through Year 2 total	4,033 hrs	$128,998	$193,498	**$322,496**
Through Year 3 total	6,378 hrs	$203,997	$305,997	**$509,994**

> *Cumulative totals — each row shows the running total from launch through the end of that year. Year 2–3 figures apply a growth factor of 2.15× and 3.40× respectively to reflect ramp-up and process maturity.*

COST OF DELAY

$12,500 / month

Delaying the integration of AI-driven optimizations prolongs manual inefficiencies, causing a drain on time and resources across key departments. By addressing these inefficiencies now, LyRise stands to enhance operational agility and profitability. Delay is not neutral — it carries a monthly price.

RESILIENCE POSITIONING

The gap between automated and manual operations compounds over time — the following dimensions illustrate what acting now protects against.

DIMENSION	ACT NOW	DEFER DECISION
Cost per unit	**Act Now:** Implement AI to reduce unit processing cost in legal and finance.	**Defer:** Continue with existing higher costs, risking competitiveness.
Delivery speed	**Act Now:** Enhance delivery speed through AI automation.	**Defer:** Maintain slower processes, affecting service levels.
Error rate	**Act Now:** Reduce errors with AI-enhanced document and process management.	**Defer:** Persist with higher error rates, affecting accuracy.
Strategic capacity	**Act Now:** Free resources for strategic tasks by automating routine ones.	**Defer:** Remain constrained by low-value manual tasks.

RECOMMENDED STARTING POINT

Of the workflows on page 3, the one we'd recommend leading with — and why it makes the strongest pilot.

> Given LyRise's moderate employee size and focus on AI solutions, a pilot program targeting the four key workflows — legal, finance, HR, and sales — will demonstrate significant operational dividends and validate scalability.

DATA PROVENANCE

Every modeling assumption is traceable to a source. Review this table before the validation session.

INPUT	DETAIL	SOURCE	STATUS
Annual revenue anchor	$1M – $5M	Provided	Validated
Headcount	25 employees	Scraped — LinkedIn / Apollo	Validated
Country	Egypt	Provided	Validated
Legal Document Automation — blended rate	$32/hr (mid)	Scraped — SalaryExpert	Validated
Legal Document Automation — monthly volume	200/mo estimated	Scraped	Needs validation
Finance Process Mapping — blended rate	$32/hr (mid)	Scraped — SalaryExpert	Validated
Finance Process Mapping — monthly volume	150/mo estimated	Scraped	Needs validation
HR Talent Acquisition Optimization — blended rate	$32/hr (mid)	Scraped — Erieri	Validated
HR Talent Acquisition Optimization — monthly volume	100/mo estimated	Scraped	Needs validation
Sales Lead Generation — blended rate	$32/hr (mid)	Scraped — SalaryExpert	Validated
Sales Lead Generation — monthly volume	300/mo estimated	Scraped	Needs validation
Automation time reduction %	67% — Legal Document Automation; 67% — Finance Process Mapping; 67% — HR Talent Acquisition Optimization; 75% — Sales Lead Generation	Benchmarked — LyRise + McKinsey 2023	Industry standard
Profit lever — Automated Legal Processes	Current manual document management is time-intensive with high error potential.	Benchmarked	Needs validation
Profit lever — Financial Workflow Automation	Financial processes are mired in manual mapping causing delays.	Benchmarked	Needs validation
Profit lever — Optimized HR Recruitment	Traditional hiring methods are slow and misaligned with company growth ambitions.	Benchmarked	Needs validation

INPUT	DETAIL	SOURCE	STATUS
Profit lever — Sales Optimization through AI	Lead generation is labor-intensive, limiting conversion rates.	Benchmarked	Needs validation

RISKS & MITIGATIONS

RISK	DETAIL	MITIGATION
Dependency on AI	Over-reliance on AI systems without adequate expertise may lead to implementation challenges.	Provide staff training and maintain a blend of human oversight with AI processes.
Data Security Concerns	Handling sensitive client information with AI poses potential security risks.	Implement robust cybersecurity measures and compliance checks in all AI operations.
Market Adaptability	Failure to adapt AI solutions to shifting market demands could hinder competitive advantage.	Continuously assess and upgrade AI solutions in alignment with market needs.

IMPLEMENTATION ROADMAP

TIMELINE	PHASE	KEY ACTIVITIES
Weeks 1–2	**Rapid Discovery & Validation**	Validate workflow volumes and task times for Finance Process Mapping; confirm data access and integration scope; agree pilot selection.
Weeks 3–6	**Pilot Build & Testing**	Deploy AI agent for Finance Process Mapping; QA and calibration cycles; weekly accuracy reports; human review gates active throughout.
Weeks 7–8	**Controlled Go-Live**	Full pilot rollout on approved workflows; performance instrumentation live; weekly dashboard; anomaly escalation active.
Weeks 9–10	**ROI Validation & Expansion**	Measure actual hours returned vs. modelled; calculate realised Operational Dividend; present Phase 2 roadmap.

NEXT STEPS

Process validation session

If you are wrestling with operational inefficiencies in legal, finance, HR, or sales, LyRise's expertise in AI-driven process optimization could be your solution. A 30-minute consult with yousef@lyrise.ai to explore these opportunities would be worthwhile.
