---	---

LyRise is a 25-person technology / saas firm. Across its workflows — product management and strategy, data analysis and modeling, automated reporting and insights generation, business process mapping — the same structural drain recurs: qualified professionals spending significant time on high-volume, rules-based process that does not require their judgment. This report estimates \$150K in Total Financial Gain available through targeted AI deployment — without adding headcount.

THE PATTERN UNDERNEATH

LyRise's operational bottleneck lies in manually mapping business processes for AI integration. Addressing this with automation can significantly enhance efficiency and client service value.

WHERE THE OPERATIONAL DIVIDEND COMES FROM

What is Operational Dividend? The dollar value of hours recaptured each month when AI takes over high-volume, rules-based work currently consuming your team. The table below contrasts hours spent today vs. after AI, then prices the freed time at fully-loaded labor rates. Total Operational Dividend: **\$50K / yr**

Workflow	Hrs/mo Now	Hrs/mo After AI	Hrs Saved/mo	Value/mo	AI Agent Deployed
Product Management and Strategy	90	57	33	\$1,320	Strategy Planner
Data Analysis and Modeling	100	63	37	\$1,184	Model Optimizer
Automated Reporting and Insights Generation	60	31	29	\$928	Insight Generator
Business Process Mapping	60	37	23	\$736	Process Mapper
TOTALS	310	188	122	\$4,168	1,461 hrs/yr · 0.7 FTE equiv.
Total Operational Dividend (per year)				\$49,999 / yr · value of hours recaptured	

WHERE THE PROFIT UPLIFT COMES FROM

What is Profit Uplift? Operational Dividend = the value of hours freed from manual work. Profit Uplift = what those freed hours produce when redirected to higher-value activity. These are sequential effects of the same improvement — not the same hours counted twice. Total Profit Uplift: **\$100K / yr**

Workflow	Uplift Lever	How It Works — Full Logic
Product Management and Strategy	Efficiency in Product Management	30 hrs/mo freed × \$45/hr × 0.35 directed = \$1,834/mo
Data Analysis and Modeling	Streamlined Data Modeling	37 hrs/mo freed × \$38/hr × 0.35 directed = \$1,469/mo
Automated Reporting and Insights Generation	Accelerated Reporting	29 hrs/mo freed × \$35/hr × 0.35 directed = \$1,124/mo
Total Profit Uplift: \$99,998/yr		Total Financial Gain: \$149,997/yr · All levers require validation in Phase 1.

COST OF DELAY

\$12,500 / month

Delaying the implementation of AI-driven process mapping leaves LyRise at risk of losing clients to more agile competitors who offer faster and more accurate AI integration. Failure to quickly optimize client processes could result in missed opportunities for operational enhancement. Delay is not neutral — it carries a monthly price.

WHAT HAPPENS NEXT

Process validation session

If your organization is focused on optimizing business processes through AI and seeking to enhance client engagement, a 30-minute call with elena@lyrise.ai would be worthwhile.
