---	---

LyRise is a 25-person technology / saas firm. Across its workflows — finance process mapping, sales lead generation, hr talent acquisition optimization, legal document automation — the same structural drain recurs: qualified professionals spending significant time on high-volume, rules-based process that does not require their judgment. This report estimates \$150K in Total Financial Gain available through targeted AI deployment — without adding headcount.

THE PATTERN UNDERNEATH

LyRise faces manual inefficiencies in its core operations such as legal, finance, HR, and sales. By implementing customized AI solutions, the company can streamline these functions, unlocking significant operational dividends.

WHERE THE OPERATIONAL DIVIDEND COMES FROM

What is Operational Dividend? The dollar value of hours recaptured each month when AI takes over high-volume, rules-based work currently consuming your team. The table below contrasts hours spent today vs. after AI, then prices the freed time at fully-loaded labor rates. Total Operational Dividend: **\$60K / yr**

Workflow	Hrs/mo Now	Hrs/mo After AI	Hrs Saved/mo	Value/mo	AI Agent Deployed
Finance Process Mapping	113	71	42	\$1,344	Finance AI Agent
Sales Lead Generation	100	61	39	\$1,248	Sales AI Agent
HR Talent Acquisition Optimization	100	62	38	\$1,216	HR AI Agent
Legal Document Automation	100	63	37	\$1,184	Legal AI Agent
TOTALS	413	257	156	\$4,992	1,876 hrs/yr · 0.9 FTE equiv.
Total Operational Dividend (per year)				\$59,999 / yr · value of hours recaptured	

WHERE THE PROFIT UPLIFT COMES FROM

What is Profit Uplift? Operational Dividend = the value of hours freed from manual work. Profit Uplift = what those freed hours produce when redirected to higher-value activity. These are sequential effects of the same improvement — not the same hours counted twice. Total Profit Uplift: **\$90K / yr**

Workflow	Uplift Lever	How It Works — Full Logic
Legal Document Automation	Automated Legal Processes	37 hrs/mo freed × \$32/hr × 1.50 redirected = \$1,748/mo
Finance Process Mapping	Financial Workflow Automation	42 hrs/mo freed × \$32/hr × 1.50 redirected = \$2,019/mo
HR Talent Acquisition Optimization	Optimized HR Recruitment	38 hrs/mo freed × \$32/hr × 1.50 redirected = \$1,820/mo
Sales Lead Generation	Sales Optimization through AI	39 hrs/mo freed × \$32/hr × 1.50 redirected = \$1,914/mo
Total Profit Uplift: \$89,999/yr		Total Financial Gain: \$149,998/yr · All levers require validation in Phase 1.

COST OF DELAY

\$12,500 / month

Delaying the integration of AI-driven optimizations prolongs manual inefficiencies, causing a drain on time and resources across key departments. By addressing these inefficiencies now, LyRise stands to enhance operational agility and profitability. Delay is not neutral — it carries a monthly price.

WHAT HAPPENS NEXT

Process validation session

If you are wrestling with operational inefficiencies in legal, finance, HR, or sales, LyRise's expertise in AI-driven process optimization could be your solution. A 30-minute consult with yousef@lyrise.ai to explore these opportunities would be worthwhile.
