

LyRise

AI Profit & Productivity Report

Hypothesis-Driven Projection | Pending stakeholder validation

PREPARED FOR

DATE & CURRENCY

Yousef, COO

May 2, 2026 | USD

HOURS RETURNED / YEAR	OPERATIONAL DIVIDEND (PER YEAR)	PROFIT UPLIFT (PER YEAR)	TOTAL FINANCIAL GAIN (PER YEAR)
1,161 96 hrs/month · 0.6 FTE equiv.	\$70K Labor value recaptured	\$139K Redirected capacity gains	\$209K OD + Profit Uplift

RESULTS WE'VE DELIVERED FOR SIMILAR COMPANIES

FINANCIAL SERVICES Quantrax Corporation \$390K total gain in Year 1 › ~3,300 hrs freed per year (~2 FTEs) › \$70K/year Operational Dividend › \$290K/year Profit Uplift › \$390K Total Financial Gain "The LyRise team helped Quantrax create outstanding scoring models in a complex debt-collection industry. I would recommend them if you want to buil..." Ranjan Dharmaraja, Founder & CEO	LEGAL & PROFESSIONAL SERVICES NY Law Firm \$450K total gain in Year 1 › ~10,000 hrs freed per year (~6 FTEs) › \$300K/year Operational Dividend › \$225K/year Profit Uplift › \$450K Total Financial Gain "LyRise helped us reclaim thousands of attorney hours and redirect them to higher-value client work." Managing Partner, NY Law Firm

ABOUT LYRISE AI

LyRise AI is a specialist AI automation consultancy that helps growth-stage and enterprise businesses identify and eliminate operational drag through intelligent agents and workflow automation. We have delivered measurable ROI for clients in financial services, legal, technology, and professional services across the GCC and globally.

STRATEGY ROI discovery, process mapping, automation roadmaps	BUILD Custom AI agents, integrations, and workflow deployments	SCALE Ongoing optimisation, monitoring, and capability expansion
--	--	--

EXECUTIVE SUMMARY

SaaS companies like LyRise face significant challenges in scaling customer acquisition and optimizing integration processes, where automation can offer meaningful solutions.

WORKFLOWS IDENTIFIED > Sales Proposal Generation > Content Creation for Marketing > Customer Support Ticket Resolution > Internal Data Analysis and Reporting	ANNUAL FINANCIAL IMPACT (PER YEAR) <table><tr><td>Hours Returned / Year</td><td>1,161</td></tr><tr><td>Operational Dividend</td><td>\$69,634</td></tr><tr><td>Profit Uplift</td><td>\$139,268</td></tr><tr><td>Total Financial Gain</td><td>\$208,902</td></tr><tr><td>FTE Equivalent</td><td>0.6</td></tr></table>	Hours Returned / Year	1,161	Operational Dividend	\$69,634	Profit Uplift	\$139,268	Total Financial Gain	\$208,902	FTE Equivalent	0.6

Operational Dividend	\$69,634										
Profit Uplift	\$139,268										
Total Financial Gain	\$208,902										
FTE Equivalent	0.6										

DISCLAIMER

This report is prepared by LyRise AI and is intended solely for the use of the named recipient. All financial projections are estimates based on industry benchmarks, publicly available company data, and information provided by the recipient. Actual results will vary. This report does not constitute formal business, financial, or legal advice. No business decisions should be made solely on the basis of this document. LyRise AI accepts no liability for decisions taken in reliance on this report without independent verification.

COMPANY SNAPSHOT

COMPANY DETAIL	SOURCE
LyRise specializes in providing AI solutions for businesses within the Technology/SaaS industry.	Scraped
The company seeks to enhance customer satisfaction and retention through automation of support services.	Benchmarked
Sales proposal automation aims to improve response time and conversion rates.	Benchmarked
Content creation automation is crucial for maintaining LyRise's online marketing presence.	Benchmarked
Data analysis automation provides critical strategic insights efficiently.	Benchmarked

PROPOSED AI WORKFLOWS

The 4 workflows we'd automate — current baseline cost, post-AI hours, value recaptured per month, and the agent we would deploy. Target outcomes and rationale appear under each workflow's row.

WORKFLOW	VOL/MO	BEFORE AI (HRS)	AFTER AI (HRS)	HRS SAVED/MO	RATE	MONTHLY COST	VALUE RECAPTURED/MO	AI AGENT
Sales Proposal Generation	100	1.00	0.33	30	\$60/hr	\$6,000	\$1,800	Proposal AI
Benchmarked								
Sales Team								
Target outcome: Boosted sales productivity and higher conversion rates. · Why it fits: Offers faster responses to potential clients, enhancing the chances of conversion.								
Content Creation for Marketing	50	2.00	0.50	28	\$60/hr	\$6,000	\$1,680	Content AI
Benchmarked								
Marketing Team								
Target outcome: Consistent and high-quality marketing content. · Why it fits: Maintains a consistent online presence and attracts potential clients.								
Customer Support Ticket Resolution	300	0.25	0.08	24	\$60/hr	\$4,500	\$1,440	Support Automation AI
Benchmarked								
Customer Support Team								
Target outcome: Increased resolution speed and enhanced customer satisfaction. · Why it fits: Efficient ticket handling is critical for tech companies to maintain customer satisfaction and retention.								
Internal Data Analysis and Reporting	40	1.50	0.50	14	\$60/hr	\$3,600	\$840	Analytics AI
Benchmarked								
Analytics Team								
Target outcome: Faster reporting cycles and improved data-driven decisions. · Why it fits: Assists in strategic decision-making by providing timely insights.								
Totals — across 4 workflows				96 hrs		\$20,100	\$5,760/mo	

HOW THIS IS CALCULATED

Formula: Value recaptured/mo = Volume × (Before AI hrs – After AI hrs) × Rate (\$/hr)

Worked example — Sales Proposal Generation: $100 \times 0.67 \text{ hrs} \times \$60/\text{hr} = \$1,800/\text{mo}$

Monthly total: $\$1,800 + \$1,680 + \$1,440 + \$840 = \$5,760/\text{mo}$

Annual hours returned: $96 \times 12 = 1,152 \text{ hrs}$ (~0.6 FTEs at 2,080 hrs/yr)

Annual Operational Dividend: $\$5,760/\text{mo} \times 12 = \$69,634$

PROFIT UPLIFT ANALYSIS

Downstream revenue and margin gains from redirecting recaptured capacity. All arithmetic is shown for transparency.

LEVER	DERIVED FROM	BASELINE	AI AGENT ACTION	RATIONALE & ARITHMETIC
Enhanced Sales Proposal Efficiency	Sales Proposal Generation	Generates 100 proposals monthly, currently taking 60 minutes each.	Savings of 40 minutes per proposal using AI.	30 hrs/mo freed × \$60/hr × 0.35 redirected = \$630/mo
Streamlined Content Marketing	Content Creation for Marketing	50 pieces of content monthly, taking 120 minutes each.	Reduction to 30 minutes per piece allows better resource allocation.	28 hrs/mo freed × \$60/hr × 0.35 redirected = \$588/mo
Automated Support Ticket Resolution	Customer Support Ticket Resolution	Handles 300 tickets monthly, each taking 15 minutes.	AI reduces this to 5 minutes per ticket.	24 hrs/mo freed × \$60/hr × 0.35 redirected = \$504/mo
Annual incremental profit (per year)				\$139,268

UNDERSTANDING THESE NUMBERS

OPERATIONAL DIVIDEND

\$69,634

Direct labor value recaptured from freed hours — measurable on day one of full adoption

PROFIT UPLIFT

\$139,268

Downstream revenue and margin gains from redirecting recaptured capacity to higher-value activities

TOTAL FINANCIAL CASE — 3-YEAR PROJECTION (CUMULATIVE TOTALS)

HORIZON	HOURS RETURNED (CUMULATIVE)	OPERATIONAL DIVIDEND (CUMULATIVE)	PROFIT UPLIFT (CUMULATIVE)	TOTAL FINANCIAL GAIN (CUMULATIVE)
Year 1 total	1,161 hrs (~0.6 FTEs)	\$69,634	\$139,268	\$208,902
Through Year 2 total	2,496 hrs	\$149,713	\$299,426	\$449,139
Through Year 3 total	3,947 hrs	\$236,756	\$473,511	\$710,267

Cumulative totals — each row shows the running total from launch through the end of that year. Year 2–3 figures apply a growth factor of 2.15× and 3.40× respectively to reflect ramp-up and process maturity.

COST OF DELAY

\$17,409 / month

Delaying the implementation of automation solutions in customer support, sales, content marketing, and data analysis could result in missed opportunities for efficiency and customer satisfaction. Delay is not neutral — it carries a monthly price.

RESILIENCE POSITIONING

The gap between automated and manual operations compounds over time — the following dimensions illustrate what acting now protects against.

DIMENSION	ACT NOW	DEFER DECISION
Cost per unit	Act Now: Reduces cost per ticket and proposal significantly with AI.	Defer: Costs remain steady without operational efficiencies.
Delivery speed	Act Now: Enhances response and resolution times across functions.	Defer: Current timelines might result in delayed responses.
Error rate	Act Now: AI reduces human errors in proposal generation and support.	Defer: Error rates persist with manual processes.
Strategic capacity	Act Now: Frees up resources for strategic innovations and growth.	Defer: Resources remain tied to repetitive tasks.

RECOMMENDED STARTING POINT

Of the workflows on page 3, the one we'd recommend leading with — and why it makes the strongest pilot.

A pilot focusing on implementing AI tools for key workflows at LyRise will demonstrate measurable gains in efficiency and satisfaction quickly. With an estimated 96 hours returned monthly, this initiative comes with a strategic advantage.

DATA PROVENANCE

Every modeling assumption is traceable to a source. Review this table before the validation session.

INPUT	DETAIL	SOURCE	STATUS
Customer Support Ticket Resolution — blended rate	\$60/hr	Benchmarked	Needs validation
Customer Support Ticket Resolution — monthly volume	300/mo estimated	Benchmarked	Needs validation
Sales Proposal Generation — blended rate	\$60/hr	Benchmarked	Needs validation
Sales Proposal Generation — monthly volume	100/mo estimated	Benchmarked	Needs validation
Content Creation for Marketing — blended rate	\$60/hr	Benchmarked	Needs validation
Content Creation for Marketing — monthly volume	50/mo estimated	Benchmarked	Needs validation
Internal Data Analysis and Reporting — blended rate	\$60/hr	Benchmarked	Needs validation
Internal Data Analysis and Reporting — monthly volume	40/mo estimated	Benchmarked	Needs validation
Automation time reduction %	67% — Customer Support Ticket Resolution; 67% — Sales Proposal Generation; 75% — Content Creation for Marketing; 67% — Internal Data Analysis and Reporting	Benchmarked — LyRise + McKinsey 2023	Industry standard
Profit lever — Enhanced Sales Proposal Efficiency	Generates 100 proposals monthly, currently taking 60 minutes each.	Benchmarked	Needs validation
Profit lever — Streamlined Content Marketing	50 pieces of content monthly, taking 120 minutes each.	Benchmarked	Needs validation
Profit lever — Automated Support Ticket Resolution	Handles 300 tickets monthly, each taking 15 minutes.	Benchmarked	Needs validation

RISKS & MITIGATIONS

RISK	DETAIL	MITIGATION
Over-reliance on technology	Heavy dependence on AI might create challenges in situations requiring human intuition.	Maintain a balanced integration of AI with human oversight.
Data security and privacy	An increased use of AI tools may lead to vulnerabilities regarding data handling.	Implement robust security measures and compliance protocols.
Change management	Adoption of AI solutions requires adjustments in existing workflows and roles.	Provide comprehensive training and involve teams in the transition process.

IMPLEMENTATION ROADMAP

TIMELINE	PHASE	KEY ACTIVITIES
Weeks 1–2	Rapid Discovery & Validation	Validate workflow volumes and task times for Sales Proposal Generation; confirm data access and integration scope; agree pilot selection.
Weeks 3–6	Pilot Build & Testing	Deploy AI agent for Sales Proposal Generation; QA and calibration cycles; weekly accuracy reports; human review gates active throughout.
Weeks 7–8	Controlled Go-Live	Full pilot rollout on approved workflows; performance instrumentation live; weekly dashboard; anomaly escalation active.
Weeks 9–10	ROI Validation & Expansion	Measure actual hours returned vs. modelled; calculate realised Operational Dividend; present Phase 2 roadmap.

NEXT STEPS

Process validation session
