

LyRise

AI Profit & Productivity Report

Insight-Driven Analysis | Pending stakeholder validation

PREPARED FOR

DATE & CURRENCY

Yousef, COO

May 5, 2026 | USD

HOURS RETURNED / YEAR	OPERATIONAL DIVIDEND (PER YEAR)	PROFIT UPLIFT (PER YEAR)	TOTAL FINANCIAL GAIN (PER YEAR)
1,461 122 hrs/month · 0.7 FTE equiv.	\$50K Labor value recaptured	\$100K Redirected capacity gains	\$150K OD + Profit Uplift

This represents approximately 5% of your estimated annual revenue returned through operational efficiency — without adding headcount.

RESULTS WE'VE DELIVERED FOR SIMILAR COMPANIES

FINANCIAL SERVICES Quantrax Corporation \$390K total gain in Year 1 › ~3,300 hrs freed per year (~2 FTEs) › \$70K/year Operational Dividend › \$290K/year Profit Uplift › \$390K Total Financial Gain "The LyRise team helped Quantrax create outstanding scoring models in a complex debt-collection industry. I would recommend them if you want to buil..." Ranjan Dharmaraja, Founder & CEO	LEGAL & PROFESSIONAL SERVICES NY Law Firm \$450K total gain in Year 1 › ~10,000 hrs freed per year (~6 FTEs) › \$300K/year Operational Dividend › \$225K/year Profit Uplift › \$450K Total Financial Gain "LyRise helped us reclaim thousands of attorney hours and redirect them to higher-value client work." Managing Partner, NY Law Firm

ABOUT LYRISE AI

LyRise AI is a specialist AI automation consultancy that helps growth-stage and enterprise businesses identify and eliminate operational drag through intelligent agents and workflow automation. We have delivered measurable ROI for clients in financial services, legal, technology, and professional services across the GCC and globally.

STRATEGY ROI discovery, process mapping, automation roadmaps	BUILD Custom AI agents, integrations, and workflow deployments	SCALE Ongoing optimisation, monitoring, and capability expansion
--	--	--

EXECUTIVE SUMMARY

LyRise's operational bottleneck lies in manually mapping business processes for AI integration. Addressing this with automation can significantly enhance efficiency and client service value.

WORKFLOWS IDENTIFIED > Product Management and Strategy > Data Analysis and Modeling > Automated Reporting and Insights Generation > Business Process Mapping	ANNUAL FINANCIAL IMPACT (PER YEAR) Hours Returned / Year1,461 Operational Dividend\$49,999 Profit Uplift\$99,998 Total Financial Gain\$149,997 FTE Equivalent0.7

COMPANY SNAPSHOT

COMPANY DETAIL	SOURCE
25 employees	Scraped — LinkedIn
Annual revenue \$1M – \$5M	Provided
Country: Egypt	Provided
LyRise operates in the Technology/SaaS industry, specializing in AI solutions for business optimization.	Scraped
The company is based in Egypt and serves data and engineering teams.	Scraped
LyRise employs approximately 25 people, corroborated by public records.	Scraped
Revenue estimates align with the \$1M-\$5M range common in mid-sized SaaS companies.	Benchmarked

PROPOSED AI WORKFLOWS

The 4 workflows we'd automate — current baseline cost, post-AI hours, value recaptured per month, and the agent we would deploy. Target outcomes and rationale appear under each workflow's row.

WORKFLOW	VOL/MO	BEFORE AI (HRS)	AFTER AI (HRS)	HRS SAVED/MO	RATE	MONTHLY COST	VALUE RECAPTURED/MO	AI AGENT
Product Management and Strategy Scraped Product Manager	30	3.00	1.50	33	\$40/hr	\$3,600	\$1,320	Strategy Planner
Target outcome: Well-crafted AI products that align with market demands and technology trends. · Why it fits: Drives the development and iteration of cutting-edge AI products, keeping LyRise competitive in the market.								
Data Analysis and Modeling Scraped AI Engineer	50	2.00	1.00	37	\$32/hr	\$3,200	\$1,184	Model Optimizer
Target outcome: Improved accuracy and efficiency of AI models resulting in better client satisfaction and retention. · Why it fits: This workflow is crucial for creating tailored AI solutions that meet specific business needs, vital for LyRise's core offerings.								
Automated Reporting and Insights Generation Scraped Data Scientist	60	1.00	0.33	29	\$32/hr	\$1,920	\$928	Insight Generator
Target outcome: Regular, accurate reports that enable clients to make informed decisions swiftly. · Why it fits: Enhances the value of LyRise's AI solutions by providing actionable insights through automated reports.								
Business Process Mapping Scraped Business Analyst	40	1.50	0.75	23	\$32/hr	\$1,920	\$736	Process Mapper
Target outcome: Detailed maps of client processes leading to targeted AI integration strategies. · Why it fits: Essential for understanding client operations and identifying key areas for AI implementation, enhancing LyRise's service value.								
Totals — across 4 workflows				122 hrs		\$10,640	\$4,168/mo	

HOW THIS IS CALCULATED

Formula: Value recaptured/mo = Volume × (Before AI hrs – After AI hrs) × Rate (\$/hr) × Adoption ramp factor

Worked example — Product Management and Strategy: $30 \times 1.50 \text{ hrs} \times \$40/\text{hr} \times 0.73 = \$1,320/\text{mo}$

Adoption ramp factor combines realistic adoption (rarely 100% on day one), realization, and revenue-band alignment into one multiplier.

Monthly total: $\$1,320 + \$1,184 + \$928 + \$736 = \$4,168/\text{mo}$

Annual hours returned: $122 \times 12 = 1,464 \text{ hrs}$ (~0.7 FTEs at 2,080 hrs/yr)

Annual Operational Dividend: $\$4,168/\text{mo} \times 12 = \$49,999$

PROFIT UPLIFT ANALYSIS

Downstream revenue and margin gains from redirecting recaptured capacity. All arithmetic is shown for transparency.

LEVER	DERIVED FROM	BASELINE	AI AGENT ACTION	RATIONALE & ARITHMETIC
Efficiency in Product Management	Product Management and Strategy	Managed AI product offerings and strategies in a competitive market.	AI-driven strategies reduce time and improve market alignment.	33 hrs/mo freed × \$40/hr × 2.00 redirected = \$2,696/mo
Streamlined Data Modeling	Data Analysis and Modeling	Development of AI models tailored for client needs.	Automated model adjustments save significant time.	37 hrs/mo freed × \$32/hr × 2.00 redirected = \$2,368/mo
Accelerated Reporting	Automated Reporting and Insights Generation	Generation of AI-driven insights and reports for clients.	Automated reports replace manual data handling.	29 hrs/mo freed × \$32/hr × 2.00 redirected = \$1,862/mo
Annual incremental profit (per year)				\$99,998

UNDERSTANDING THESE NUMBERS

OPERATIONAL DIVIDEND

\$49,999

Direct labor value recaptured from freed hours — measurable on day one of full adoption

PROFIT UPLIFT

\$99,998

Downstream revenue and margin gains from redirecting recaptured capacity to higher-value activities

TOTAL FINANCIAL CASE — 3-YEAR PROJECTION (CUMULATIVE TOTALS)

HORIZON	HOURS RETURNED (CUMULATIVE)	OPERATIONAL DIVIDEND (CUMULATIVE)	PROFIT UPLIFT (CUMULATIVE)	TOTAL FINANCIAL GAIN (CUMULATIVE)
Year 1 total	1,461 hrs (~0.7 FTEs)	\$49,999	\$99,998	\$149,997
Through Year 2 total	3,141 hrs	\$107,498	\$214,996	\$322,494
Through Year 3 total	4,967 hrs	\$169,997	\$339,993	\$509,990

Cumulative totals — each row shows the running total from launch through the end of that year. Year 2–3 figures apply a growth factor of 2.15× and 3.40× respectively to reflect ramp-up and process maturity.

COST OF DELAY

\$12,500 / month

Delaying the implementation of AI-driven process mapping leaves LyRise at risk of losing clients to more agile competitors who offer faster and more accurate AI integration. Failure to quickly optimize client processes could result in missed opportunities for operational enhancement. Delay is not neutral — it carries a monthly price.

RESILIENCE POSITIONING

The gap between automated and manual operations compounds over time — the following dimensions illustrate what acting now protects against.

DIMENSION	ACT NOW	DEFER DECISION
Cost per unit	Act Now: AI reduces operational costs significantly per client engagement.	Defer: Costs remain high with inefficient manual processes.
Delivery speed	Act Now: Automated processes cut delivery times drastically.	Defer: Slow, manual mapping and reporting hamper delivery.
Error rate	Act Now: Automation reduces errors in process mapping and reporting.	Defer: High risk of human error without automation.
Strategic capacity	Act Now: AI adoption frees up resources for strategic development.	Defer: Resources tied up in routine tasks, limiting strategic growth.

RECOMMENDED STARTING POINT

Of the workflows on page 3, the one we'd recommend leading with — and why it makes the strongest pilot.

Given LyRise's size and focus on AI solutions, a pilot program automating business process mapping could return significant hours and provide immediate client value recognition.

DATA PROVENANCE

Every modeling assumption is traceable to a source. Review this table before the validation session.

INPUT	DETAIL	SOURCE	STATUS
Annual revenue anchor	\$1M – \$5M	Provided	Validated
Headcount	25 employees	Scraped — LinkedIn / Apollo	Validated
Country	Egypt	Provided	Validated
Data Analysis and Modeling — blended rate	\$32/hr (mid)	Scraped — Jobicy	Validated
Data Analysis and Modeling — monthly volume	50/mo estimated	Scraped	Needs validation
Business Process Mapping — blended rate	\$32/hr (mid)	Scraped — SalaryExpert	Validated
Business Process Mapping — monthly volume	40/mo estimated	Scraped	Needs validation
Product Management and Strategy — blended rate	\$40/hr (senior)	Scraped — Glassdoor	Validated
Product Management and Strategy — monthly volume	30/mo estimated	Scraped	Needs validation
Automated Reporting and Insights Generation — blended rate	\$32/hr (mid)	Scraped — PayScale	Validated
Automated Reporting and Insights Generation — monthly volume	60/mo estimated	Scraped	Needs validation
Automation time reduction %	50% — Data Analysis and Modeling; 50% — Business Process Mapping; 50% — Product Management and Strategy; 67% — Automated Reporting and Insights Generation	Benchmarked — LyRise + McKinsey 2023	Industry standard
Profit lever — Efficiency in Product Management	Managed AI product offerings and strategies in a competitive market.	Benchmarked	Needs validation
Profit lever — Streamlined Data Modeling	Development of AI models tailored for client needs.	Benchmarked	Needs validation

INPUT	DETAIL	SOURCE	STATUS
Profit lever — Accelerated Reporting	Generation of AI-driven insights and reports for clients.	Benchmarked	Needs validation

RISKS & MITIGATIONS

RISK	DETAIL	MITIGATION
Market Adoption	The AI solutions offered may face slow adoption if clients are resistant to change.	Provide clear demonstration of time and cost benefits to encourage adoption.
Technical Integration	Incompatible tech infrastructure might hinder AI implementation.	Offer tailored integration support to clients.
Data Privacy	AI data handling could raise privacy concerns among clients.	Implement robust data protection measures and clear privacy policies.

IMPLEMENTATION ROADMAP

TIMELINE	PHASE	KEY ACTIVITIES
Weeks 1–2	Rapid Discovery & Validation	Validate workflow volumes and task times for Product Management and Strategy; confirm data access and integration scope; agree pilot selection.
Weeks 3–6	Pilot Build & Testing	Deploy AI agent for Product Management and Strategy; QA and calibration cycles; weekly accuracy reports; human review gates active throughout.
Weeks 7–8	Controlled Go-Live	Full pilot rollout on approved workflows; performance instrumentation live; weekly dashboard; anomaly escalation active.
Weeks 9–10	ROI Validation & Expansion	Measure actual hours returned vs. modelled; calculate realised Operational Dividend; present Phase 2 roadmap.

NEXT STEPS

Process validation session
